Breach: true

Name: Anti Public Combo List

Bio: In December 2016, a huge list of email address and password pairs appeared in a "combo list" referred to as "Anti Public". The list contained 458 million unique email addresses, many with multiple different passwords hacked from various online systems. The list was broadly circulated and used for "credential stuffing", that is

attackers employ it in an attempt to identify other online systems where the account owner had reused their password. For detailed background on this incident, read [Password reuse, credential stuffing and another billion records in Have I Been Pwned](#).

Breach: true

Name: Gravatar

Website: gravatar.com

Bio: In October 2020, [a security researcher published a technique for scraping large volumes of data from Gravatar, the service for providing globally unique avatars](#) . 167 million names, usernames and MD5 hashes of email addresses used to reference users' avatars were subsequently scraped and distributed within the hacking community. 114 million of the MD5 hashes were cracked and distributed alongside the source hash, thus disclosing the original email address and accompanying data. Following the impacted email addresses being searchable in HIBP, [Gravatar release an FAQ detailing the incident](#).

Breach: true

Name: Houzz

Website: houzz.com

Bio: In mid-2018, the housing design website [Houzz suffered a data breach](#). The company learned of the incident later that year then disclosed it to impacted members in February 2019. Almost 49 million unique email addresses were in the breach alongside names, IP addresses, geographic locations and either salted hashes of passwords or links to social media profiles used to authenticate to the service. The data was provided to HIBP by [dehashed.com](#).

Breach: true

Name: Luxottica

Website: luxottica.com

Bio: In March 2021, the world's largest eyewear company [Luxottica](#) suffered a data breach via one of their partners that exposed the personal information of more than 70M people. The data was subsequently sold via a popular hacking forum in late 2022 and included email and physical addresses, names, genders, dates of birth and phone numbers. In a statement from Luxottica, they advised they were aware of the incident and are currently "considering other notification obligations".

Breach: true

Name: MyFitnessPal

Website: myfitnesspal.com

Bio: In February 2018, the diet and exercise service [MyFitnessPal](#) suffered a data breach. The incident exposed 144 million unique email addresses alongside usernames, IP addresses and passwords stored as SHA-1 and bcrypt hashes (the former for earlier accounts, the latter for newer accounts). In 2019, [the data appeared listed for](#)

[sale on a dark web marketplace](#) (along with several other large breaches) and subsequently began circulating more broadly. The data was provided to HIBP by a source who requested it to be attributed to "BenjaminBlue@exploit.im".

Breach: true

Name: Twitter (200M)

Website: twitter.com

Bio: In early 2023, [over 200M records scraped from Twitter appeared on a popular hacking forum](#). The data was obtained sometime in 2021 by abusing an API that enabled email addresses to be resolved to Twitter profiles. The subsequent results were then composed into a corpus of data containing email addresses alongside public Twitter profile information including names, usernames and follower counts.

Breach: true

Name: Zomato

Website: zomato.com

Bio: In May 2017, the restaurant guide website [Zomato was hacked](#) resulting in the exposure of almost 17 million accounts. The data was consequently redistributed online and contains email addresses, usernames and salted MD5 hashes of passwords (the password hash was not present on all accounts). This data was provided to HIBP by whitehat security researcher and data analyst Adam Davies.

Creation Date: 2017-05-17T00:00:00

The Zomato logo, consisting of the word "zomato" in white lowercase letters on a red square background.
